Technical Skills

Strong: JavaScript, HTML, CSS, jQuery, Bootstrap, AngularJS, Meteor, Underscore.js

Experienced: Node.js, Express, MongoDB, MySQL, Backbone.js, CoffeeScript, Grunt, Bower, NPM, Firebase, Heroku, Git, D3.js

Software Engineering Projects

GALVANIZE - DEVELOPMENT TEAM, DEVELOPMENT TEAM MEMBER

OPEN SOURCE HTTP/2 Library written in Rust Programming Language | <https://github.com/Galvanization/solicit>

- Created the Ping and Priority Frames following the HTTP/2 Specifications while maintaining modularity
- Designed and implemented a simple HTTP/2 server to augment the existing client in the Solicit library
- Adapted to and overcame the ever-changing nature of programming in Rust open source project

CARDS AGAINST SOBRIETY - DEVELOPMENT TEAM, LEAD UI DESIGNER

Online platform of the popular party game Cards Against Humanity | <http://cardsagainstsobriety.meteor.com>

- Constructed user interface using Handlebars to maximize ease-of-use and to encourage interactivity
- Utilized Meteor's built in authentication module to implement user account creation and login
- Designed project landing page using Bootstrap and deployed using Microsoft Azure and FileZilla

GIT INSIGHTS - PRODUCT OWNER AND DEVELOPMENT TEAM MEMBER

Github data search and visualization tool for recruiters | <http://gitinsights.herokuapp.com>

- Implemented a stunning visual display of online repository data for search subject using D3.js
- Interfaced with GitHub API using NodeJS and Express backend to asynchronously gather data
- Configured automatic continuous deployment using Heroku and Github

MY SHOPPING APP - COLLABORATIVE SHOPPING LIST

Web app to create and update a shopping list with many users | <https://ng-shopping-list.firebaseio.com>

- Leveraged AngularJS's responsiveness to facilitate real-time updates of shopping lists between multiple users
- Implemented a simple -to-use user authentication and user information storage with Firebase

Professional Experience

VERIZON WIRELESS

2007 - 2014

- Successfully acquired a medium-sized business account through the retail channel resulting in 200+ new lines of service totalling \$100k+ in annual revenue for store location
- Created a forecasting tool to increase efficacy and impetus for the sales force that saw an average increase of 30% in total compensation

UNITED STATES MARINE CORPS RESERVES

2004 - 2008

- Graduated with honors as top of class from Personnel Administration School, Camp Lejeune, NC
- Performed personnel operations for One Marine Auxiliary Command Element

Education

HACK REACTOR REMOTE - Advanced Software Engineering Immersive

2015

CODING HOUSE - Live-in Immersion Coding Program

2014

UNIVERSITY OF CALIFORNIA, LOS ANGELES - Major in Astrophysics

2002 - 2006

Personal

A firm believer in football not having an off-season. A gadget-freak who lot of times can't afford the things he wants. A pop star in his shower and car rocking out mostly to 90s R&B and boy band hits.
